Adding song using USB flash drive

1) Make sure you have a flash drive and it is in FAT32 format

2) Create a folder named "mp3gsong_add" for mp3 and cdg files or "mtvsong_add" for mp4, mkv, or mpg
3) files on your usb flash drive.
4) Make sure the file you are trying to add is in the form of "artist-title" and not "artist – title".
5) Plug the flash drive to the front usb port
6) Go to song manager>song import>usb
7) Now the songs will be added to the hard drive. After you added the song you can go to song
8) manager>song editor>ripped songs to see the songs you added and to change the information or delete
9) them
10) If the mp4, mkv, or mpg song you added is only giving vocal/stereo you can change the track
11) Information to track 2 to give you instrumental track, assuming that the file have 2 audio tracks
